

E8-S2

The E8-S2 is a solid brass, low-voltage, double-directional fixture on a brass riser. It can be aimed up or down and is ideal for tall ground cover. Its minimalist design brings attention to the lamp's effect, not to the fixture itself. The E8-S2 takes advantage of LED modules that can produce 10°-120° beam spreads with just a simple change of our line of field-serviceable optics.
