

7W-A / 8W-RO

7-Watt Amber and 8-Watt Red-Orange light engines are LED modules certified by Florida Fish and Wildlife Conservation Commission as 'Wildlife Friendly'. Integrated GU5.3 pins are recessed into the bottom of the module and plug into Beachside's brass socket assembly. The unit is secured by two set screws for easy replacement, combining the thermal contact of an integrated light engine with the "drop-in" capability of an MR16 lamp.

**Wildlife Lighting
Certification Number
2018-029**

Construction Anodized aluminum cylindrical body. For use in enclosed fixtures.

Voltage 12 Volts LED. Integral driver operates on 9-15 Volts AC input. Remote transformer required

Mounting Plugs into GU5.3 socket assembly. Secured with two opposing set screws.

Lamp Triple Cree XPE-2, AMBER (1400K) or RED-ORANGE (1000K)

— 7W-A-SP		12° beam / 27° field
— 7W-A-NFL	(142 lm)	29° / 49°
— 7W-A-FL		49° / 76°
— 8W-RO-SP		10° beam / 20° field
— 8W-RO-NFL	(384 lm)	29° / 45°
— 8W-RO-FL		55° / 82°

Wavelength 7W-A: 594 nanometers main, 600.5 nm peak
8W-RO: 613 nanometers main, 625.4 nm peak

L70 40,000 hours
