

# GS3R

The GS3R is a heavy-duty ground spike for a recessed telescoping stem. The fixture's stem slips into ground spike and can extend upward as foliage grows.

**Construction** Cast Brass Cap with 3/4" schedule 40 brass Pipe on a heavy duty PVC Ground Spike.

**Finish** Pipe and Cap are unfinished and will naturally patina.

**Adjustable Range** Maximum 20 inches between shortest and highest settings. Fixture stem can be longer than 20 inches.

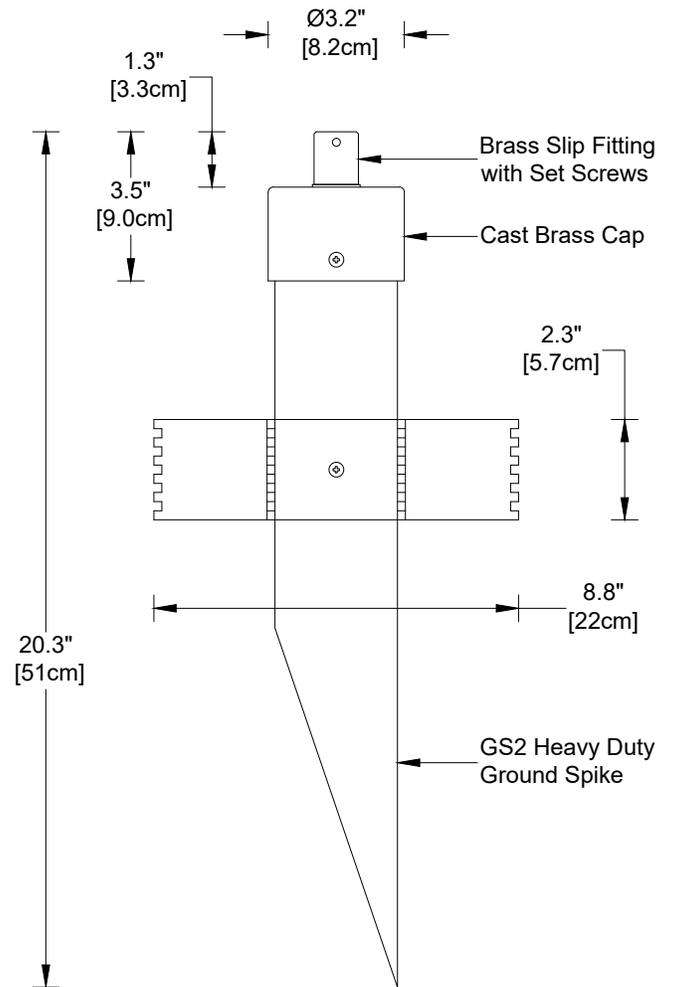

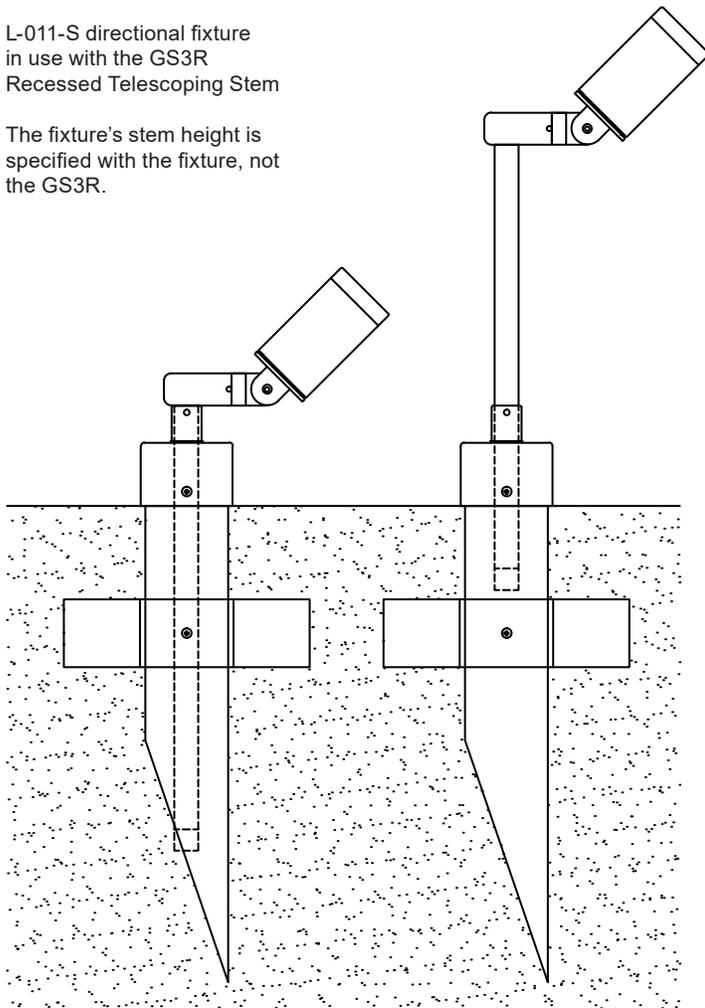

Note: Height of fixture's 1/2" sch. 40 brass stem is specified with the fixture, **NOT** the GS3R recessed telescoping stem.

**Mounting** The Pipe has a 3/4" male NPT fitting that threads into the Brass Cap. The fixture's stem slips into the Pipe and is secured using two (2) #10 set screws for height adjustability.

L-011-S directional fixture  
in use with the GS3R  
Recessed Telescoping Stem

The fixture's stem height is  
specified with the fixture, not  
the GS3R.
