L-011-WA

The L-011-WA is an unobtrusive, low-voltage, directional fixture. Its compact design brings attention to the lamp's effect, not to the fixture itself. The L-011-WA is a wide-angle version of the standard L-011, designed to fully utilize the widest beam spread and eliminate cutoff by bringing the lamp almost fully forward in the housing.

Construction   All brass components. 0.140" [3.6mm] thick brass housing.

Lens   Tempered soda lime glass. Stepped to prevent pooling of water on lens.

Lamps   12 Volts, Remote transformer required

Finish: Unfinished is standard; no specification required. The fixture will weather to a natural patina. The patina process is natural with brass and copper. Rate of patina and eventual color is dependent upon climate and proximity to the ocean. Thus, Beachside does not guarantee any specific appearance.
